# Apple Distinguished Educators

Dear Daniel Gallagher,

Thank you for applying for the Apple Distinguished Educator (ADE) Class of 2017. Unfortunately, your application was not selected for this year's program.

We appreciate the time you spent in preparing your application and sharing your story through your submission video. We received a high volume of applications this year and were pleased with the quality of applicants, which made the final task of selecting a new class more difficult than ever. With so many applications received we are unable to provide individual feedback on each application.

There are a number of other opportunities for you to remain engaged with Apple directly:

## Exploring Everyone Can Code

We believe that coding is an essential skill. So we created Swift Playgrounds and learning materials that will help everyone bring their ideas to life. We're giving everyone the power to learn, write, and teach code. Learn more about [Everyone Can Code](#) and get access to free technical resources like video and sample code by [participating in our educator forums](#).

## Visiting an Apple Store

You can attend free workshops at any Apple Store worldwide. Get help from experienced Creatives by signing up for workshops on iPad, Mac, or Apple apps like iMovie, Keynote, GarageBand, and more. Your school can also schedule a customized Field Trip that focuses on a single app with a topic or project of your choice.

[Learn about workshops and training >](#)

## Connecting on Social Media

We want to stay connected with you. Here are some ways to continue your connection with Apple and innovative educators around the globe.

- Follow [@AppleEDU](#) and join in the conversation with [#AppleTeacher](#) on Twitter.
- Join [#ADEChat](#) to collaborate with ADEs and hundreds of other educators in our Twitter chats every Tuesday evening throughout the school year. Educators answer questions and share ideas, tips, and experiences teaching with Apple products.

Thanks again for your interest in the ADE Program. We wish you continued success and welcome your application for a future ADE class.

Sincerely,  
Apple Education
